Soham Jain AMBCS

Technology Degree Apprentice @ Infinite Pi
Milton Keynes, England, United Kingdom

Summary

Technical Consultant at Infinite PI, working across software engineering, AI-enabled development and technology delivery. Building Emendant - developer infrastructure for automated API change remediation. Emendant detects upstream API changes, determines their impact on existing integrations, and generates validated code fixes. Currently completing a BSc Digital & Technology Solutions (Software Engineering) degree apprenticeship at the University of Exeter. Previously worked at the Bank of England across Enterprise Release Management and Test Environment Management. A Levels in Computer Science, Mathematics and Economics. (All social media posts and comments are my personal opinion only and do not represent the views of any employer, client, or organisation with which I may be affiliated. Experience

Infinite Pi

Technical Consultant

August 2026 - Present (2 months)

Supporting the design, development and delivery of software solutions for enterprise clients, with a focus on the Microsoft technology stack and AI-enabled software delivery.

Working across the software development lifecycle, including development, testing, deployment, version control, code review and technical documentation, alongside requirements gathering, sprint planning and client delivery.

Completing the BSc Digital & Technology Solutions (Software Engineering) degree apprenticeship at the University of Exeter alongside the role.

Emendant

Software Engineer

August 2026 - Present (2 months)

Building Emendant, developer infrastructure for automated API change remediation.

Developing the systems that detect upstream API changes, determine their impact on existing integrations, and automatically generate validated code fixes - reducing the maintenance burden created when APIs evolve.

Working across the core remediation engine, developer tooling, integrations and product infrastructure.

APIs change. Your code adapts.

Bank of England

Technology Degree Apprentice

August 2025 - August 2026 (1 year 1 month)

London Area, United Kingdom

- Supporting the Enterprise Release Management and Test Environment Management teams in delivering secure, reliable technology solutions for the Bank's core operations.
- Contributing to the governance and coordination of release cycles, ensuring testing aligns with business priorities and regulatory requirements.
- Maintaining and improving test environments, resolving conflicts and minimising downtime to enable smooth, efficient testing and delivery.
- Participating in automation initiatives and quality engineering projects, applying best practices in test data management and process optimisation.

Aylesbury Grammar School

Leader of Computer Science Society

September 2023 - July 2024 (11 months)

- Established and led the Computer Science Society at Aylesbury Grammar School, guiding students in Years 7-9 to understand coding and Computer Science fundamentals.
- Organized coding sessions to enhance students' skills and foster a passion for technology.
- Implemented interactive projects and competitions to engage students and promote teamwork within the society.

Santander UK

Work Experience

June 2024 - June 2024 (1 month)

Milton Keynes, England, United Kingdom

- Collaborated with the software engineering team at Santander UK to develop the new Santander Mobile App, gaining insights into the synergy between software engineering and financial services.
- Observed and participated in the development processes and code implementation for the app, contributing to the team's collaborative efforts.
- Acquired valuable skills in software development, project management, and teamwork during the two-day program at Santander's Software Engineering division.

Feathers Performance Academy

Assistant Coach

September 2023 - June 2024 (10 months)

Milton Keynes, England, United Kingdom

- Assisted coaching team in training young kids to enhance their badminton skills.
- Organized practice sessions and drills to improve players' techniques.
- Provided individualized feedback and support to help players reach their full potential.
